BREAD SLICER MACHINE MANUFACTURER

Italpan, a major bread slicer machine manufacturer, focuses on designing and building you the best, durable, efficient and simple bakery machinery to ease your pastry work.

OUR TWO TYPES OF BREAD SLICERS

Italpan produces two major models of bench bread slicer machines; Model 420 S and Model 520 S. The two bread slicer models have a standard loaf length passage of 420 mm and 520 mm respectively. The two models allow passage of 40/165 mm high loaves.

EFFICIENT BREAD SLICERS

Italpan bread slicer machines are designed with relatively low power consumption to minimize energy use for bakeries. The bread slicers are of standard weight usually 105 kg. These machines are built using strong materials to prevent frequent breakdowns and repairs, hence durability. The devices are also safe, simple to use, and more reliable.
