COMMERCIAL DOUGH SHEETER SUPPLIER

Sheeters produced by this leading commercial dough sheeter supplier are designed and built according to the modern criteria of functionality and rationality. The adjustable dough sheeters are made of durable steel and aluminium metals whereby the rolls are ground and plated with chromium.

SMALL, HIGHLY EFFICIENT MACHINES

Technically, the overall dimensions for the dough sheeters are minimal so as to allow easy installation of the machine in small factories. The sheeters are also fitted with casters that facilitate safe transport.

ITALPAN'S FLAGSHIP SHEETERS

The two main models of sheeters designed by Italtan are the Sheeter SF/500-600 and the Sheeter SF 500/710-950, ideal for use in small factories. These dough sheeters operate on all kinds of dough even the thin ones, scrapers are removable to facilitate daily cleaning, and are calibrated rolling cylinders that are plated with hard chromium. Frames for the Sheeter SF/500-600 are mounted on wheels to facilitate easy mobility.
