DOUGH ROLLER SHEETER SUPPLIER

As a leading dough roller sheeter supplier in Europe and all over the world, Italpan ensures production of a unique dough roller sheeter, the Bench Sheeter SF 500/710-950. This model is specifically designed for small Scale use.

SMALL, HIGHLY EFFICIENT MACHINES

This machine is relatively smaller and simpler to use, and, therefore, easy and more efficient. Besides, the construction of this machine is done using steel and aluminium and hence less susceptible to damages; durability is assured.

MODELS OF ROLLER SHEETERS

Both models of roller sheeters use a single motor each and weigh around 115-120 kg each. The model SF 500/950 is, however, bigger. Both models improve efficiency and speed in the baking process.
