## HORIZONTAL SLICER SUPPLIER

Italpan horizontal slicers are uniquely designed for high performance and efficiency. For example, the slicers are made of quality materials such as the ones making the inox steel structure. The slicers are also fitted with a fuse, transformer that pulsate mushroom and march of emergency to 24v.

## TECHNICAL CHARACTERISTICS

The horizontal slicers are connected to a motor-reducer that regulates the movement of the horizontal slicers. The maximum space between the presser conveyor belt and the transport is 60 mm. The machines are also connected to an EC norm that prevents an explosion.

## PORTABLE SLICERS

Horizontal slicers produced by this horizontal slicer supplier are therefore highly portable, safe and efficient.
