SHEETER MACHINE SUPPLIER

Sheeter machines supplied by Italpan are designed to work on all kinds of doughs, even the thin ones. Their scrapers are removable and can therefore be removed and cleaned daily. Bearing of the sheeter machines are clearly screened to prevent them from getting contaminated.

SHEETER CHARACTERISTICS

This Italian sheeter machine supplier has also fixed adjustable speed conveyors to prevent the pastry from wrinkling. Regulation of the low voltage power supply can be done either by foot or hand operated pedal whereby an accident proof safety guard is linked to the electrical system.

MOBILE SHEETERS

The frame machine can be mounted on wheels making it fully mobile. All models of this machine can be supplied with a stainless steel or painted base.
